

# Water & CO<sub>2</sub> Monitoring for Water Dispensers

fountainOS Offering | FEBRUARY 2025

The only IoT solution on the market that monitors both gas & water. Engage with your fountain even further.

# Unmonitored beverage systems waste trillions of dollars annually. We want to change that.

- > *Will your sparkling water get flat?*
- > *Will your dispenser be down for a long period with stagnation risk?*
- > *When should you change your filter to maintain the best quality?*
- > *Will you be able to reduce unplanned interventions?*
- > *Will you be able to replenish the consumables on a timely manner?*
- > *Will you be able to replenish CO2 bottles on time?*
- > *Will you be able to showcase the positive impact of client's system?*
- > *Will you be able to engage with the end-user's community?*
- > *are your systems up or down right now ?*

**...Shift to predictive maintenance with remote monitoring & alerts.**

# Addressing Water & CO<sub>2</sub> Monitoring Needs

- ❓ Sparkling water gets flat is the **1<sup>st</sup> source** of **employees' dissatisfaction** & support tickets
- 💧 **40% of filters in water fountains** are **overdue** leading to regulatory non-compliance and **revenue loss**
- 📄 Most of the service providers **manage** these assets with **paper sheets** or at best **Excel**.
- 📱 In Germany, a typical operator covers a **radius of 250km** to maintain customer's systems **at least 3x in a year**, leading to more than **30% of unplanned interventions**.
- ❓ Studies\* show that up to **65% of service calls** in the water sector could be **resolved remotely** if the **assets were online**.

by droople

## Awareness screen

Real-time insights to end users on water consumption, plastic bottles avoided, and reduction in carbon footprint.

## Maintenance book

Save time and cost with predictive usage insights, alerts and 24/7 health status of assets and consumables.

## Lean logistics

Correctly size and automate consumable replenishment.

## API integration

Delivering seamlessly, secured ERPs and API to third-party platforms

# Manage your dispensers with **fountainOS**

Analytics | Alarms | Dashboards | API

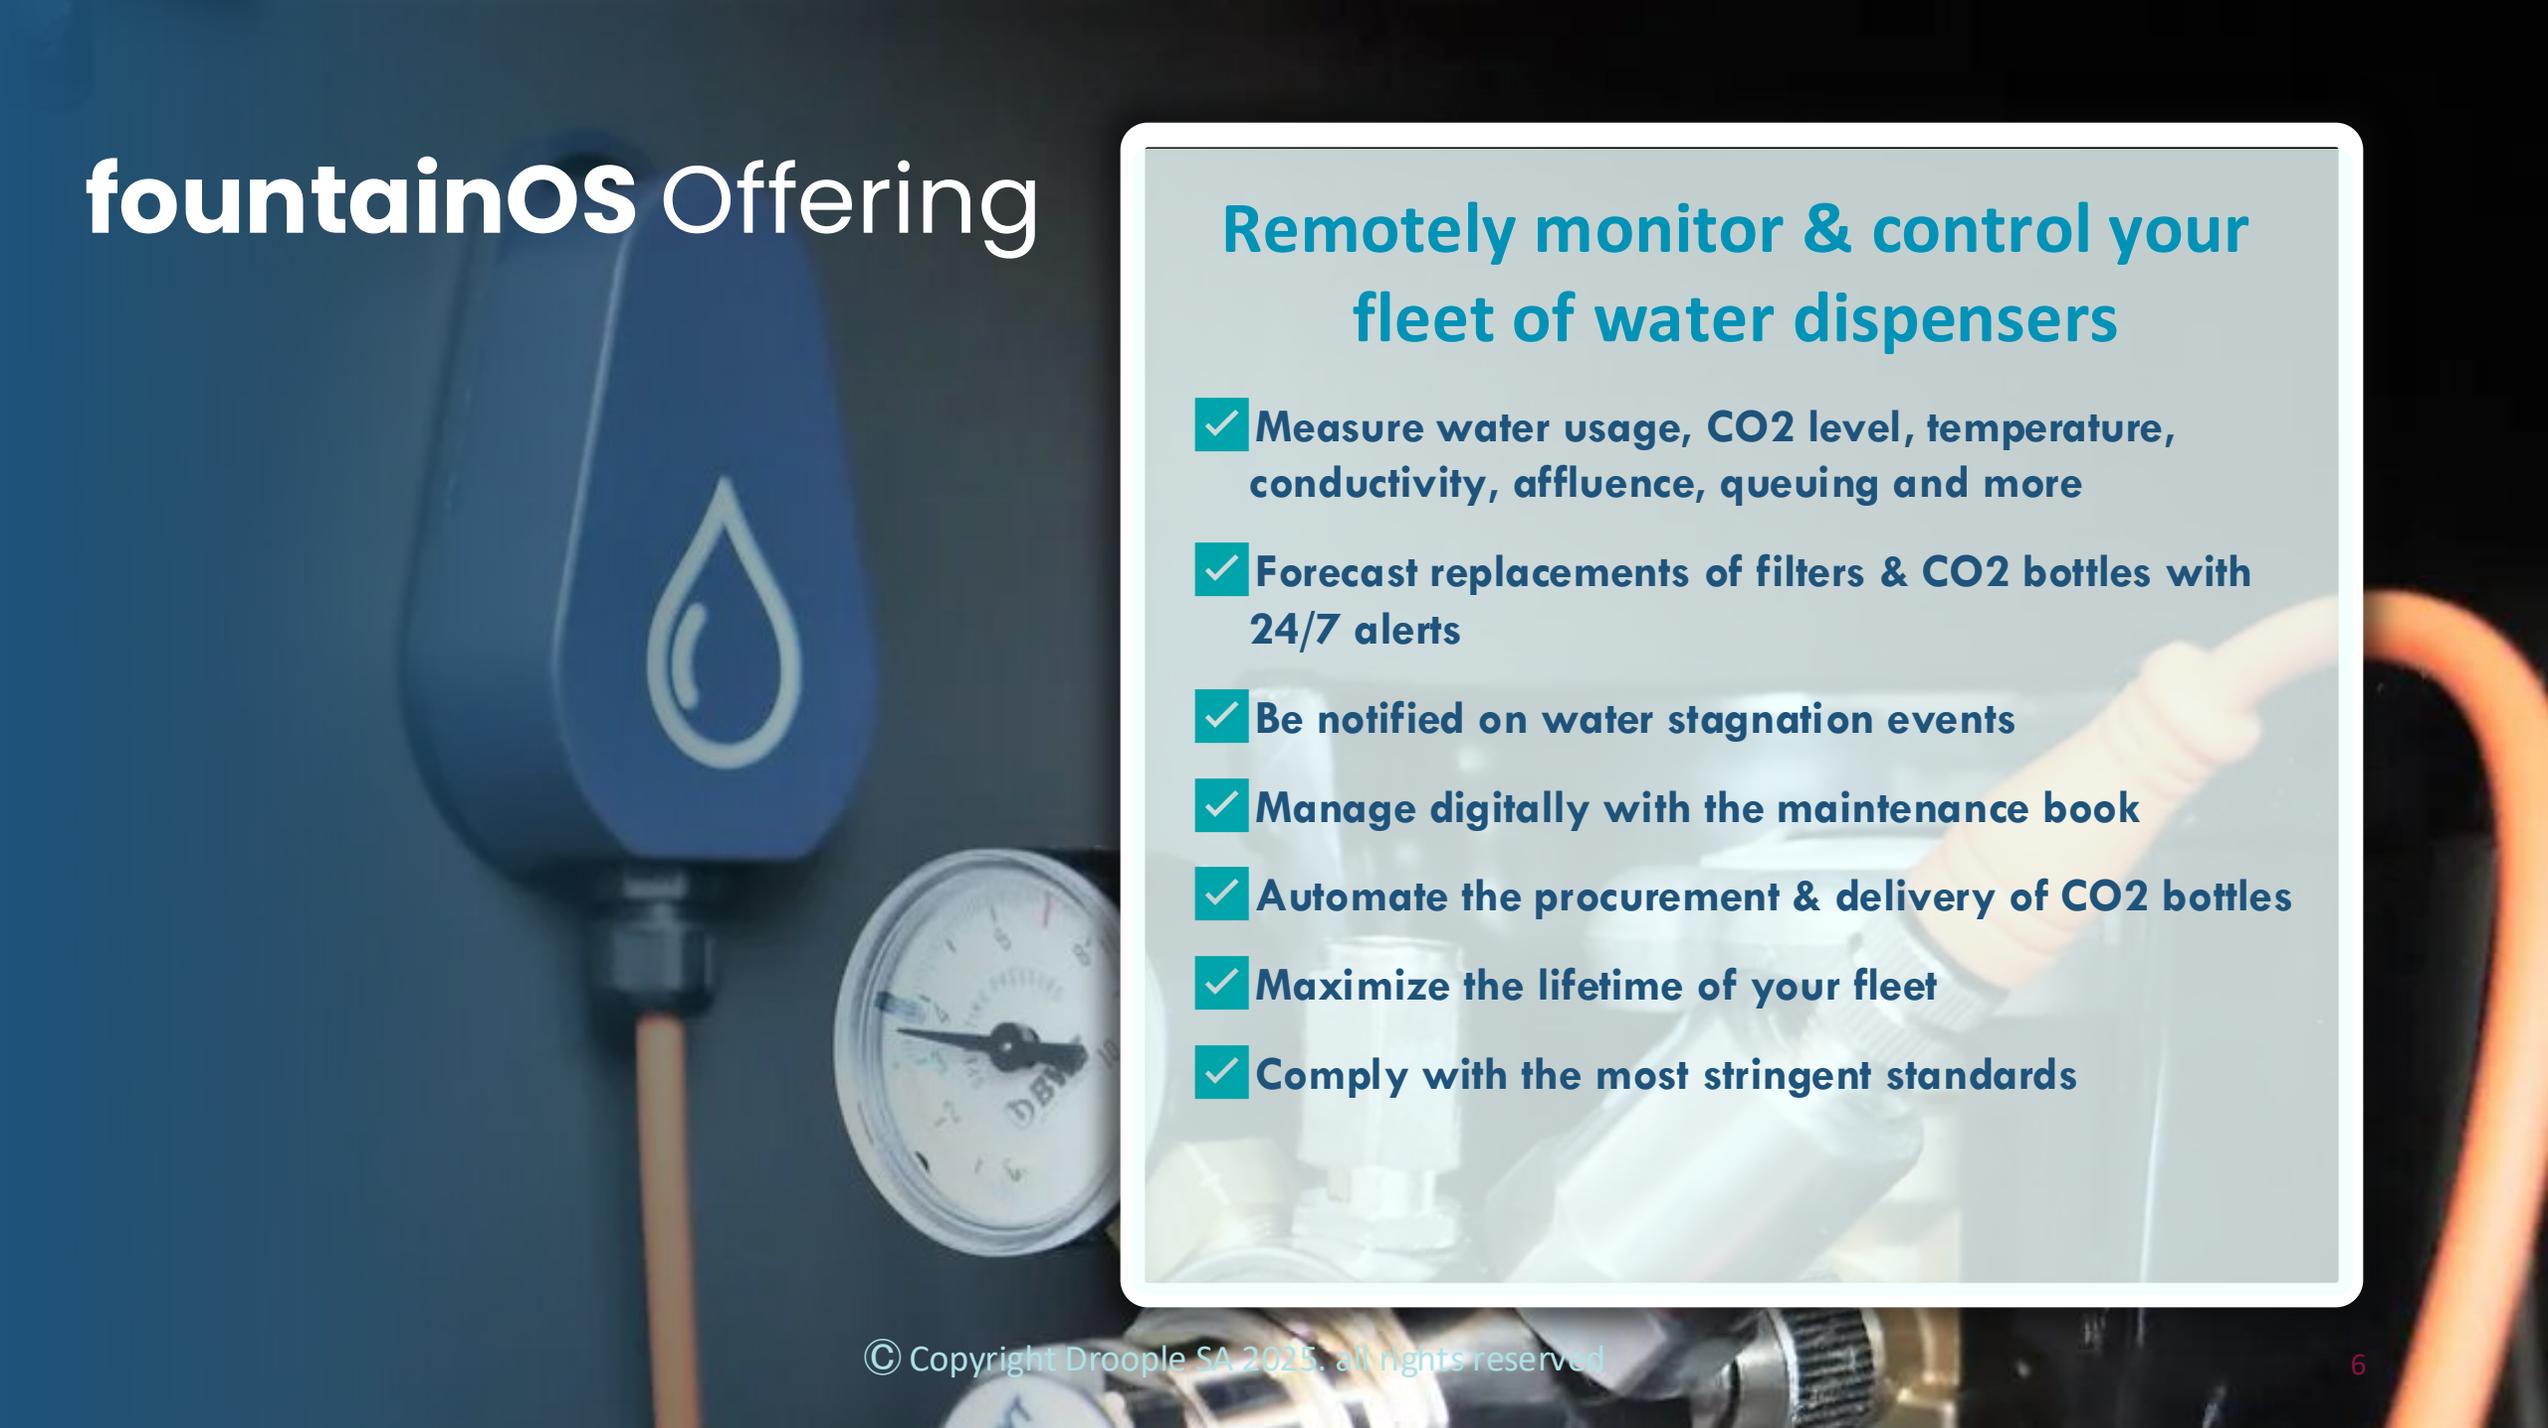

Digitize and manage your water assets to unlock real-time, actionable insights on usage, environmental impact and operational efficiencies.

Droople iLink® NB-IoT

Flow | Temperature | CO2 Pressure | TDS

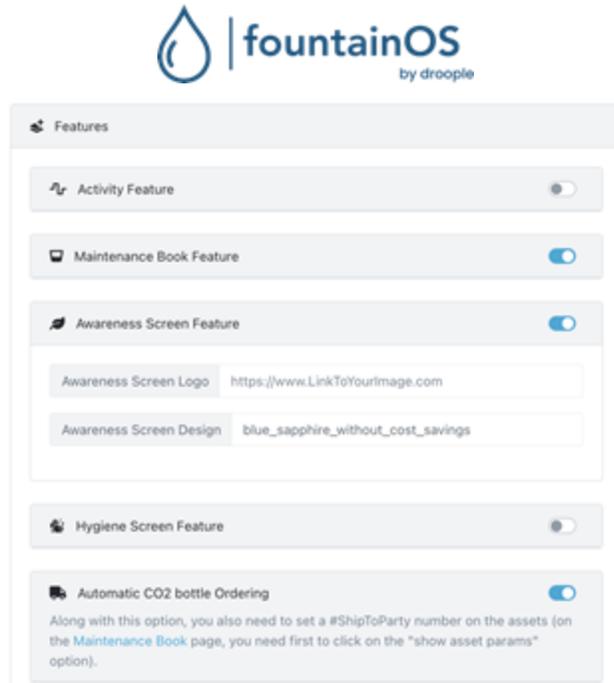

# fountainOS Offering

## Remotely monitor & control your fleet of water dispensers

- ✓ Measure water usage, CO2 level, temperature, conductivity, affluence, queuing and more
- ✓ Forecast replacements of filters & CO2 bottles with 24/7 alerts
- ✓ Be notified on water stagnation events
- ✓ Manage digitally with the maintenance book
- ✓ Automate the procurement & delivery of CO2 bottles
- ✓ Maximize the lifetime of your fleet
- ✓ Comply with the most stringent standards

# These two unmatched features solve most of the pains in the sparkling water fountains market.

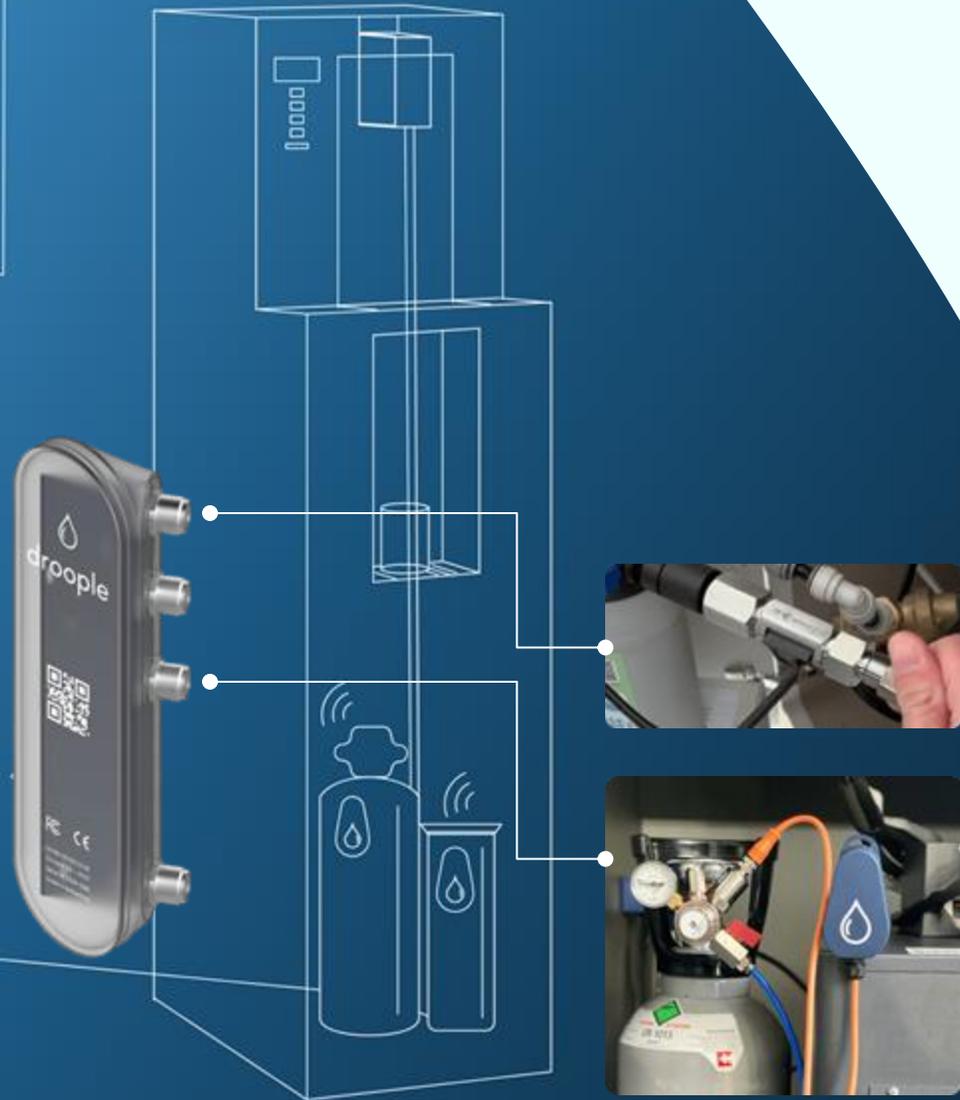

**Streamlined automated CO2** replenishment, resolving your supply chain challenges with ERP integration with your CO2 suppliers.

**Create your QR codes, stick them and engage with your communities who can access live** to the sustainable impact from the water fountain.

# How it works

## Retrofit your asset

Install directly to your inline plumbing or CO<sub>2</sub> canister. This is where water flow and gas pressure is monitored.

## Activate

Connect it to the internet and register your account onto the platform.

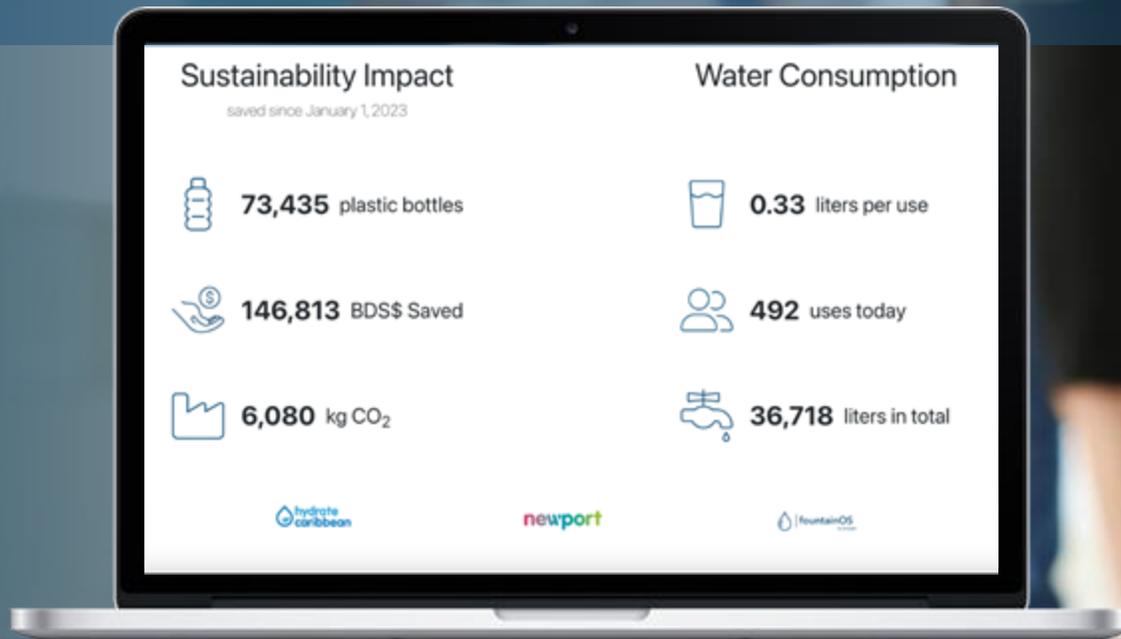

## Experience Analytics

Analyze. Predict. Get notified.

# Promote sustainable hydration

-  Raise environmental awareness
-  Sustainably hydrated employees are more productive
-  GRI and GRESB compatible water and impact data for ESG reporting (BREEAM, WELL, LEED)
-  Showcase your brand and engage with your community

CASE STUDY

# REFRESHING USA

Bringing pay per use water fountains in Walmart

Location: California, United States

Sensors: Droople Smart Flow & Trion

Extent: 20 connected fountains with Droople

Refreshing USA is equipping **every single Walmart** in the US to introduce filtered water as a service.

Thanks to our solution they can manage their fleet digitally and enable a **pay-per-use billing** service between all parties.

**Alarms** enabled the operating team to avoid unplanned interventions across the dispersed fleet all over California.

# City of Geneva – Public Water Fountain

## PROJECT:

Fontaineo (manufacturer) and the City of Geneva (SIG) collaborated to launch a campaign to beat the heat wave & reduce demand for single-use bottled water. This installation marks Switzerland's first public fountain providing still & sparkling water, 90% of which comes from the lake!

CEO, klarwa GmbH

# Manage your dispensers with **fountainOS**

## Purchase Hardware

### Droople kit

- One-off purchase 320 CHF incl. 2 sensors
- The droople kit is composed of 1 iLink® NB-IoT with 1 or 2 or up to 3 sensors

## Purchase Software

### Droople fountainOS App CHF 88 / y

- Annual fee for flow & CO2 params
- Pro rata credit upon activation
- Renewal every 1<sup>st</sup> of January
- 3-month notice period for cancellation

## Hardware as Service

### fountainOS service from CHF 170 / y

- 1 kit with minimal contract period of 3 years
- Droople kit remains Droople's ownership and could not be purchased afterward
- 3-month notice period for cancellation

## EDT & Onboarding Process

### Your journey with us starts here

- Production : 4-6 weeks from payment.
- Payment : upfront for the hardware purchase and for the software.
- Ask for our product catalogue for more.
